Opis produktu

BRAND NEW CONVERSION USING THE BEST PRODUCTS AND MATERIALS
MADE BY A PROFESSIONAL TEAM

NO VAT

The whole thing was made by a competent team that professionally deals with such productions.

Inside - built-in, new, unused. New mattress and seat upholstery. Electrical installation, battery, everything new.

Heating, hot and cold water secured by Truma 10L Boiler, two tanks are installed under the van, 70 liters for clean and 40 liters for gray water - Of course, tanks have electronic fill indicators. The entire van is insulated, windows selected specifically for the van model - Bathroom with toilet - cassette toilet - with tank replacement from the outside

and with a shower - additionally in the bathroom there is a tilting roof window with a fan

A large fan, controlled by a remote control, is also placed in the central part. Furthermore, there is a beautiful skylight window above the sleeping area.

The campervan has windows to look in any direction

The structure is very well made and the first person to see it will be interested in buying it
